

Course design

The course is full of practical hints and tips. Background reading will help you maximise the benefits of the course. Teaching sessions are short to allow delegates to spend the entire afternoon on the cadaveric dissection.

the face course 2015

Local Flaps in Facial
Reconstruction using
fresh cadaveric dissection

Guest faculty:
Shan R Baker
Anthony Tyers
Carrie Newlands
Martin Telfer

7-8th July 2015
University of Southampton, UK

Overview

Fresh Cadaveric Dissection

The course aims to provide an unrivalled learning experience for the delegate. The talks are practical, short and interactive thereby allowing the delegate the maximum use of laboratory dissection time. There are 2 delegates per head and a high faculty to delegate ratio. This allows for close supervision and teaching during the dissection sessions. The course is aimed at consultants and senior trainees in interested specialities. Numbers are strictly limited to 22 to ensure that each delegate is given exclusive access to faculty.

Guest Faculty

Prof. Shan R Baker, author of Local Flaps in Facial Reconstructive Surgery and Nasal Reconstruction shares his wealth of experience and knowledge.

Mr Anthony G Tyers, Past President of the European Society of Ophthalmic Plastic & Reconstructive Surgery and the British Oculoplastic Surgery Society and author of "A Colour Atlas of Ophthalmic Plastic Surgery

Miss Carrie Newlands, Consultant Royal Surrey County Hospital

Mr Martin Telfer, Consultant York Hospital

Mr Bhavin Visavadia, Consultant Northwick Park Hospital

Mr Philip Harries, Consultant University Hospital Southampton

thefacecourse

This is the third **face course** building on our previous experience and is again likely to be heavily oversubscribed. Delegate feedback was rated as 96% (Excellent). The HEADS UP series of courses aims to provide a high quality learning experience using renowned faculty and attention to detail.
